Welcome to CityLAB Community!

Spotlight 1

How do you set up an innovation lab?

Hello dear CityLAB Community,

In this issue we present a great idea for setting up a lab space – whether as a permanent location or as a mobile unit – a space that can be used as a think Tank or a place for sharing experience on applications that are useful for association work. The first example is the Kiezlabor, which we updated following an online survey at the beginning of the year, including suggestions for new applications. At our next network meeting, we will be presenting the tricks and methods that we use to develop prototypes, the thought-provoking input, and city-wide innovation processes. In a second talk, we look ahead to the next five years with prototypes, the methods, and the thought-provoking input. And we very much look forward to seeing you there!

Best wishes,
Nicolas Zimmer, Board Chair of Technologiestiftung Berlin

CityLAB Anniversary

The time has flown by: as of this year's Sommerkonferenz, it is exactly five years since we started providing fresh stimuli for Berlin in collaboration with the city's administration and residents. Even though the time has passed quickly, it's been a journey that has certainly not failed to leave its mark: quite the opposite! The CityLAB project has become an integral part of Berlin's digital transformation! On this note: enjoy our review and look ahead to the future in this April issue – and join us as we look forward to the next five years!
