

News from the CityLAB December 2019

Hello,

November in the CityLAB brought us a lot of exchange and creativity around developing ideas for a digital and sustainable Berlin. During the Berlin Science Week, we worked with Berliners to develop **30 Tactics for a sustainable city in 2030**, scientists discussed the **[hype and hope of AI](#)**, and citizens worked on concrete ideas how AI might be used for sustainable city digitization during the kickoff **[AI for Berlin workshop](#)**.

If you missed all of this, you can find **[pictures](#)** and **[results of the 30 Tactics for 2030](#)** event here, you can listen to the **[AI discussion via the RBB Inforadio Podcast](#)**, and we are looking forward to the continuation of the AI for Berlin Workshop next year.

City Science Slam

At the first **[City Science Slam](#)** (which focused on digital cities), Johannes Kretzschmar (**[@beetlebum](#)**) was crowned as “Slammer of the evening” based on the audience’s enthusiastic applause. You can review the evening on the **[Technology Foundation’s blog](#)** and experience for yourself in our **[pictures](#)** and the recap video that science can indeed be very funny.

Upcoming Event Highlights

29.11.19, 14.00 - 18.00 h: Open workshop

The next edition of our open workshop is dedicated to the construction of winterproof garden paradises that can fit into your apartment. We'll construct automatically irrigated beds for window sills that are equipped with light, sensors, pumps and an Internet connection – all this so you can observe the living conditions of your favourite plants from a distance. Berliners of all kinds are invited to learn in a hands-on fashion how to use coding and hardware to design the future of a green city.

Free registration via **bildung@technologiestiftung-berlin.de** and more information **[here](#)**

11.12.19, 17.00 - 20.00 h: Bündnis Digitale Stadt Berlin Information- & Networking Event

The **[Bündnis Digitale Stadt Berlin](#)** is an association of civil society, research and politics that seeks to accompany the development of the Berlin Digitization Strategy constructively and critically. At an information and network meeting, the alliance will introduce itself, initiate a first discussion on the basics and next steps of the digitization strategy, and strengthen the network between all interested parties and participants. Everyone is invited!

Free registration and more information **[here](#)**

16.12.19, 12.30 - 13.45 h: Lunch salon 'Öffentliches Gestalten'

Pack your lunch and come discuss approaches for a sustainable cooperation between the state and civil society at the first Lunch Salon 'Öffentliches Gestalten' by **[Politics4Tomorrow](#)** and the network "Öffentliches Gestalten". Friederike Weritz from the Federal Ministry of Economics will be there as an expert to answer your questions.

Free registration and more information **[here](#)**

An overview of all current and past CityLAB events can be found [here](#).

From our Exhibition

The Circular Economy stands for reusing, resharing and recycling of resources to provide sustainable alternative to an economy that produces large amounts of waste. [Circular Berlin](#) visualises the diverse community active in this field with a dynamic map of organisations and projects in Berlin. The map will continue to grow and new entries can be added at the website circular.berlin.

The CityLAB interactive exhibition gives an overview of various facets of our work.

Now also open on **Saturdays from 10 to 17 h!**

Address: Platz der Luftbrücke 4, Building H2rund, 12101 Berlin (U Platz der Luftbrücke)
Exhibition opening hours: Wed-Sat, 10-17 h; free admission

Do you have any questions? Then write to us at: info@citylab-berlin.org

We wish you a fantastic December.
