We wish you a great April full of the joys of spring!

The CityLAB Berlin team is planning to take part, with the following two events:

1. **Meet the CityLAB Berlin team**
   - A series of events presenting our projects and engaging in direct dialogue. The first stop will be the administration of Berlin's Senate and District administrations, and participants will be able to present them on Stadtpuls – even without programming skills. Zirfas explains how you can create small-scale projects that use sensor data and present them based on narrative formats.
   - Participants will have the opportunity to discuss their ideas with a FabLab at CityLAB's premises in Tempelhof. New Stadtpuls story and features at https://stadtpuls.de

2. **Services for Modernization**
   - The CityLAB drops by to pay a visit: the administration of Berlin's Senate and District administrations. The roadshow will be touring Berlin's Senate and District administrations, presenting our projects and engaging in direct dialogue. The first stop will be the administration of Berlin's Senate and District administrations, and participants will be able to present them on Stadtpuls – even without programming skills. Meet the CityLAB Berlin team

Goodbyes hurt – this one in particular. Our dear Gosia, who's been part of the team, will be leaving us to pursue new adventures. We will miss her dearly, but wish her the best of luck in her future endeavors. Our heartfelt thanks go to Gosia for all her hard work and dedication.

If you'd like more of Ingo, we also recommend that you listen to our interview with him, where he shares insights into the world of digital engagement and urban planning. Weigand answer some questions for you.

Meet Ingo

Our roadshow will be touring Berlin's Senate and District administrations, presenting our projects and engaging in direct dialogue.
